**** Source: Indiana State Department of Health (ISDH) website. Report Card scores based on ISDH computation for September 2002. The ISDH provides Report Cards for all certified nursing facilities in Indiana. A summary and scoring system was created for presenting key survey results that would be useful to consumers, called the "Nursing Home Report Card". This system was developed by ISDH in conjunction with the Indiana Association of Homes and Services for the Aging and the Indiana Health Care Association, which represent nursing facility providers throughout Indiana. Note that the best possible score a facility can achieve is 0 points and the simple average of the scores of the facilities presented on this report is 175. The ISDH updates scores monthly as facilities are surveyed. For more current information about a specific nursing facility, please visit the ISDH website at <http://www.in.gov/isdh/regsvcs/providers.htm>

**** Source: Indiana State Department of Health (ISDH) website. Report Card scores based on ISDH computation for September 2002. The ISDH provides Report Cards for all certified nursing facilities in Indiana. A summary and scoring system was created for presenting key survey results that would be useful to consumers, called the "Nursing Home Report Card". This system was developed by ISDH in conjunction with the Indiana Association of Homes and Services for the Aging and the Indiana Health Care Association, which represent nursing facility providers throughout Indiana. Note that the best possible score a facility can achieve is 0 points and the simple average of the scores of the facilities presented on this report is 175. The ISDH updates scores monthly as facilities are surveyed. For more current information about a specific nursing facility, please visit the ISDH website at <http://www.in.gov/isdh/regsvcs/providers.htm>

**** Source: Indiana State Department of Health (ISDH) website. Report Card scores based on ISDH computation for September 2002. The ISDH provides Report Cards for all certified nursing facilities in Indiana. A summary and scoring system was created for presenting key survey results that would be useful to consumers, called the "Nursing Home Report Card". This system was developed by ISDH in conjunction with the Indiana Association of Homes and Services for the Aging and the Indiana Health Care Association, which represent nursing facility providers throughout Indiana. Note that the best possible score a facility can achieve is 0 points and the simple average of the scores of the facilities presented on this report is 175. The ISDH updates scores monthly as facilities are surveyed. For more current information about a specific nursing facility, please visit the ISDH website at <http://www.in.gov/isdh/regsvcs/providers.htm>

**** Source: Indiana State Department of Health (ISDH) website. Report Card scores based on ISDH computation for September 2002. The ISDH provides Report Cards for all certified nursing facilities in Indiana. A summary and scoring system was created for presenting key survey results that would be useful to consumers, called the "Nursing Home Report Card". This system was developed by ISDH in conjunction with the Indiana Association of Homes and Services for the Aging and the Indiana Health Care Association, which represent nursing facility providers throughout Indiana. Note that the best possible score a facility can achieve is 0 points and the simple average of the scores of the facilities presented on this report is 175. The ISDH updates scores monthly as facilities are surveyed. For more current information about a specific nursing facility, please visit the ISDH website at <http://www.in.gov/isdh/regsvcs/providers.htm>
